

## Subject 18

An architect began the sketch of a corridor. He drew a wide rectangle window on the right wall. He just began to draw the ground tiles but didn't finish.

The architect respected the rules of the one point perspective with one vanishing point.

1. The ground tiles are square. Draw the first three rows of 4 tiles. Let the sketch lines.
2. The rectangular window of the right wall is a casement window. The two opening parts are symmetrical. The separation is vertical. At the midpoint of this vertical line, there's a lock. Complete the vertical separation with a segment and the lock as the point L.
